

Dr. O'Campo is an international leader in Social Epidemiology and Tier 1 Canada Research Chair in Population Health Intervention Research at the MAP Centre for Urban Health Solutions and the University of Toronto Dalla Lana School of Public Health. As an innovator, she has advanced quantitative methodologies and expanded the knowledge base on community-based solutions to urban health inequities. Dr. O'Campo's work focuses on upstream determinants of health and specializes in quantifying the impacts of structural issues and social programs, with an eye toward concrete, multilevel solutions. Her research is almost always undertaken by creating dedicated partnerships with affected communities. Through these partnerships she has been successful at advancing effective solutions to reduce urban based health inequities.

Her work has been widely recognized in Canada and the United States. She is a member of the Canadian Academy of Health Sciences and the Royal Society of Canada.
